Activity 5: Data Visualization

Due on 05/21 (Tuesday) by class time

For this activity, you will be exploring a data project's visualizations. Pick a data project from: https://pudding.cool/ or you can also identify a data project on your own.

As you explore the data project of your choice, you should address the following points (you can address them in bullet points):

- Describing your project-of-choice
  - Title and link to your data project of choice
  - Brief summary of the digital project you are exploring
  - What are the objectives of the authors/researchers/scholars?

- Describe the visualizations (screenshots of the visualization can help you better demonstrate your points)
  - Is there sufficient context provided for the visualization?
  - What strategies in visualization do they use to facilitate their objectives?
  - Which was the most effective visualization?
  - Which visualization would you make changes on?

Level-up component:
- Pick a data visualization from: https://viz.wtf/
  - Explain why what you have chosen is not a good visualization
  - What improvements will you make to improve the visualization and why?

You may choose to submit this activity in a format that best works for you (e.g. word document, slideshow). Please use the MLA citation format for your sources, *including the data project you have chosen*. An example is available below:

Last name, First name. "Title of web page." *Name of website,* link of webpage. Accessed Day
    Month Year.
